**Hapkido's philosophy** is based on the principles of Yin & Um. Rather than opposing force with force, a student of Hapkido accepts and redirect the opponent's force, using it to defeat him. Circular, fluid movement, rather than linear movement, is used for techniques.

## Won

### "The Circle Principle"

The circle is an important figure in Hapkido. In movement it represents smooth flowing motion as opposed to straight or linear movement. Force is not met with force, rather it is redirected away from the Hapkido defender. One's personal space is a circle, into which none may enter. The circle also represents that invisible and ever changing range at which strikes and further out, kicks will be a danger to the Hapkidoist. Won also represents the circle of life. We start our Hapkido life as a white belt beginner. After years of study and progression up the ranks, the student achieves black belt, only to find that they have come the complete circle and are now beginners again. Outside of the do-jang, we begin life dependent on others. Often, after Living a full life, the circle is completed as we end life again dependent on others. Hapkido is full of circular motion, almost every technique applies this principle, in one way or another, especially airplane, backspin and any throw.

**"Serious Students\*"** are the backbone of any dojang. They are the gears that keep things moving.

Dedicated students would be a better term - serious about training and serious about furthering hapkido. They are the ones who take the wheel and drive schools into new directions.

One in every 15-20 students stays for the long haul. They are the ones who come to train when the weather is bad and when the weather is great. They are the ones that work through and adapt to injury and setbacks. They are the ones that continue on by teaching the way to a new generation.

They are the greatest asset any school and instructor can ever have.

If you have something to say we want to hear it: *events, seminars, testing, promotions, opinions, questions, experiences, photos etc, on and off the mat.*

Want to have your school profiled in an upcoming issue of the **WHA Newsletter**? Send us a bio on the school, instructor(s) and a photo and we will include it.

## **Concept vs. Technique\***

Concepts are but ideas - thought patterns ones goes thru to determine a course of training.

It is not until we put those concepts into reality - our training - does it become technique. That is not to say that technique is purely a physically thing - it can be mental, emotional and spiritual. But it is not until the concept becomes part of what we do is it considered a technique.

Once it becomes technique then it can be applied to everything we do - on and off the mat. No matter how big or small - it all has a great impact on what we do and how we choose to do it.

2. Take Exit 16 (Wood Village exit) Southbound towards Gresham
3. Follow signs for US 26 Eastbound
4. Continue on US 26 East approximately 101 miles to Madras, where US 26 merges with US 97
